What do teen-agers like in the clothing line?

Mothers who help select clothing will be interested in answers given by teen-agers all over the country in a survey conducted by a pattern company, and reported by Iva Byrd Johnson, clothing specialist at VPI.

First for fall and winter came the jumper with the full swing princess line, or the straight skirt. The jumper gives an opportunity to add and/or subtract accessories to fit mood and occasion.

The suit with hip line jacket and two skirts—one full, one slim—was favorite for dressy wear. For casual wear, boxy jackets were favored as comfortable for all day.

Skirts, vests, blouses or shirts, sweaters or jackets to mix and match for variety rated high.

Full-skirted dresses for dates, with many petticoat ruffles, some with three-quarter length sleeves, were chosen. A variety of collars, from wide puritan in pique or linen, to small pert angora-knits, were liked. Others liked short sleeves for dates, and stand-up collars, or plain necklines for change of accessories.

Separated to mix for dressy occasions are popular too. Included are jersey tops with taffeta skirts, or velveteen blouse and jersey, tweed, satin or brocaded skirts. Also liked are lace, printed wool or nubby cottons.

Patterns are designed for chubby girls, and fit those who have to cut down on teen-size or add to girls' size patterns. They are comparable to womens' half sizes. The designs are slimming to help Miss Chubby appear thinner and taller.

Winter cottons are available in lovely designs and finishes, Miss Johnson says. They are popular and come in colorful, easy-to-keep designs.

For jersey blouses of wool, the washable finishes are available. It's advisable to consider shrinkage control for all members of the family, especially those at the rapidly growing stage. Buy woolens treated with moth repellant or use a product containing EQ-53 on washable woolens.

A Prayer for the Nation

Almighty God, who hast given us this good land for our heritage; we humbly beseech Thee that we may always prove ourselves a people mindful of Thy favor and glad to do Thy will. Bless our nation with honorable industry, sound learning and pure manners. Save us from violence, discord and confusion; from pride and arrogancy, and from every evil way. Defend our liberties and fashion into one united people the multitudes brought hither out of many kindreds and tongues. Endue with the spirit of wisdom those to whom in Thy name we entrust the authority of government, that there may be justice and peace at home, and that, through obedience to Thy law, we may show forth Thy praise among the nations of the earth. In the time of prosperity, fill our hearts with thankfulness, and in the day of trouble, suffer not our trust in Thee to fail; all which we ask through Jesus Christ our Lord.

FORD TRACTORS ARE ON DISPLAY

The new "600" Ford Tractor with 31 "step-ahead" features in tractor design will be on display Saturday, November 20, at Pulliam Motor Sales, here, according to H. C. Pulliam.

Termed the most advanced tractor on the market today, the Ford "600" features a larger capacity hydraulic system, improved carburetion and fuel feed, redesigned and strengthened power train, larger brakes and many other improvements.

"We're calling it the 'Better than ever' Ford tractor, Mr. Pulliam said, "because the new features are in addition to the economical 'Red Tiger' engine, 3-point hitch, live-action hydraulic system and proof meter which have proven so popular in previous models."

The larger capacity hydraulic system features a big 3-inch ram cylinder and a sturdier lift cover, providing not only increased lifting power but smoother operation as well. The 3-point linkage for implements has been improved with the addition of an adjustable top link and stronger liftlinks for easy adjustment of mounted implements from the tractor seat.

The Ford "Red Tiger" engine features a redesigned carburetor and sediment bulb with a center feed gas tank for better carburetion and fuel feed under a wide range of conditions. A new 3-blade fan and improved water pump will increase engine efficiency.

The rear axle has been redesigned and strengthened, and improved lubrication of the axle assembly has been provided.
